

Oh By The Way.....

Following is a list intended to help you prepare for your trip and not forget something important or something you might not be aware of:

- **The climate along the south central coast of Alaska ranges from a temperature of 35 degrees overnight in the early and late summer to highs not exceeding 65-70 degrees in mid summer.**
- **Due to the temperatures you'll encounter and the fact that the saltwater is always cooler than on shore temperatures, we highly recommend bringing a sturdy hooded jacket, hats, gloves, heavy socks, sturdy shoes/boots, long underwear and various layers of other garments to insure you stay warm. Hooded sweatshirts and sweaters are always nice to have along. The saltwater is always cooler and damper than anyone imagines.**
- **It does rain more than a little. Please be sure to bring along rain gear, preferably a rain suit but at least a rain poncho. On the other hand, I would be sure to have a pair of sun glasses with me as well.**
- **If you wish to fish the local rivers with us on foot and own chest waders and felt soled boots then we suggest that you bring them along. We do have hip boots on hand if you do not presently own boots or waders.**
- **It is not necessary to bring any trolling rods or reels along on your trip in that we have a very good supply of high quality equipment. However, if you have an 8 or 9 weight fly rod that you prefer to our loaner fly rods then bring them along in a suitable rod case. The same should be said of flies/vests etc. For additional information on this subject, please call or email.**
- **Bring your camera although we do have loaners available. We can have your film processed for you or you can wait until you return home. Film and processing is less expensive at home**
- **Please do not bring any firearms on your trip or to the lodge property**
- **Do bring along any personal items, prescription drugs, or cosmetics you may require during your stay although most are probably available locally if need be and we're happy to obtain whatever you need while you stay with us.**
